Arrowhead to Present at Upcoming Conferences

PASADENA, Calif.--(BUSINESS WIRE)-- Arrowhead Research Corporation (NASDAQ: ARWR), a biopharmaceutical company developing targeted RNAi therapeutics, today announced that the company will make presentations at the following upcoming events.

The Liver Meeting 2015®, 66th Annual Meeting of the American Association for the Study of Liver Disease (AASLD) - San Francisco, November 13-17, 2015

November 15, 3:15 p.m. PST - Christine Wooddell, Ph.D., Arrowhead group leader will deliver an oral presentation titled, "**Reductions in cccDNA under NUC and ARC-520 therapy in chimpanzees with chronic hepatitis B virus infection implicate integrated DNA in maintaining circulating HBsAg**"

November 16, 8:00 a.m. - 5:30 p.m. PST - Man-Fung Yuen, M.D., Ph.D., chair of gastroenterology and hepatology, The University of Hong Kong, and deputy chief of service, Queen Mary Hospital department of medicine, Hong Kong, will deliver a late-breaking poster presentation titled, "**ARC-520 produces deep and durable knockdown of viral antigens and DNA in a phase II study in patients with chronic hepatitis B**"

November 16, 6:30 p.m. PST - Arrowhead management will host an **Analyst and Investor Reception** to discuss ARC-520 and key data being presented at the conference

November 17, 8:00 a.m. - 12:00 p.m. PST - Christine Wooddell, Ph.D., Arrowhead group leader will deliver a poster presentation titled, "**Monthly dosing of ARC-520 in chronically hepatitis B virus infected chimpanzees produces rapid, deep and durable reductions in circulating viral antigens**"

Jefferies Autumn 2015 Global Healthcare Conference - London, UK, November 18-19, 2015

November 19, 2:40 p.m. GMT - Chris Anzalone, Ph.D., Arrowhead president and chief executive officer, will present a company overview

Piper Jaffray 27th Annual Healthcare Conference - New York, December 1-2, 2015

December 2, 3:00 p.m. EST - Chris Anzalone, Ph.D., Arrowhead president and chief executive officer, will present a company overview in a fireside chat with Ted Tenthoff, senior research analyst, Piper Jaffray

HEP DART 2015 - Wailea, Hawaii, December 6-10, 2015

December 2, 6:40 p.m. HST - Bruce Given, M.D., Arrowhead chief operating officer, will deliver an oral presentation titled, "***New insights on HBV biology from the ARC-520 development program***"

December 8, 4:00 - 5:30 p.m. HST - Christine Wooddell, Ph.D., Arrowhead group leader will deliver a poster presentation titled, "***Sustained reduction in HBsAg, HBV DNA and HBeAg seroconversion in a chronically HBV-infected chimpanzee treated with nucleoside analog/ARC-520 combination therapy***"

Links to the webcasts and copies of presentation materials, if available, can be accessed by visiting the Events section of the company's website at http://ir.arrowheadresearch.com/events.cfm.

About ARC-520

Arrowhead's RNAi-based candidate ARC-520 is being investigated in the treatment of chronic HBV infection. The small interfering RNAs (siRNAs) in ARC-520 intervene at the mRNA level, upstream of the reverse transcription process where current standard of care nucleotide and nucleoside analogues act. Arrowhead is investigating ARC-520 specifically to determine if it can be used to achieve a functional cure, which is an immune clearant state characterized by hepatitis B s-antigen negative

serum with or without sero-conversion. Arrowhead is conducting Phase 2b multiple dose and combination studies in chronic HBV patients. Approximately 350-400 million people worldwide are chronically infected with the hepatitis B virus, which can lead to cirrhosis of the liver and is responsible for 80% of primary liver cancers globally.

About Arrowhead Research Corporation

Arrowhead Research Corporation is a biopharmaceutical company developing targeted RNAi therapeutics. The company is leveraging its proprietary Dynamic Polyconjugate™ delivery platform to develop targeted drugs based on the RNA interference mechanism that efficiently silences disease-causing genes. Arrowhead's pipeline includes ARC-520 and ARC-521 for chronic hepatitis B virus, ARC-AAT for liver disease associated with alpha-1 antitrypsin deficiency, ARC-F12 for hereditary angioedema and thromboembolic diseases, and ARC-HIF2 for renal cell carcinoma.
